About stride length

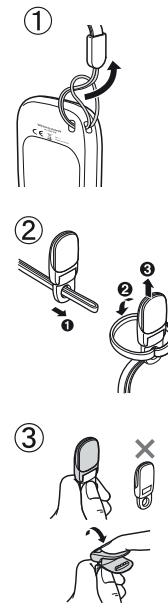

- Measure your stride length first for accurate measurement.
- To measure the correct average stride length, divide the total length of the steps you walked by the number of steps (e.g. 7.2 meter divided by 10 steps = 72 cm).
- The distance display is calculated by multiplying the adjusted stride length by the number of steps.

Note: If the initial settings are not correct, the measurement results may not be accurate.

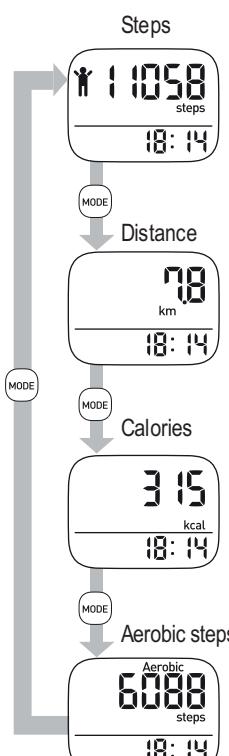

3.

- EN Attach unit.
- IT Fissare l'unità.
- DE Gerät befestigen.

- SV Visa resultatet: Tryck på ▲ för att ändra skärmen.
- TR Sonuç kontrolü: Ekranı değiştirmek için ▲ ögesine basın.

Aerobic steps (brisk walking)

Aerobic steps are the physical exercise that helps us stay healthy. Aerobic steps are counted separately when walking more than 60 steps per minute and more than 10 minutes successively. If a rest of less than 1 minute is taken after a continuous brisk walk of more than 10 minutes, this will be regarded as part of "a continuous walk".

Other Languages see 10.

Cases where the unit may not be able to count steps accurately.

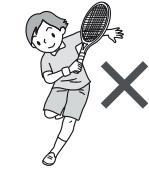

Irregular movement

- When the unit is placed in a bag that moves irregularly.
- When the unit hangs from your waist or a bag.

Inconsistent walking pace

- When you shuffle or wear sandals etc.
- When you cannot walk at a consistent pace in a crowded area.

Excessive vertical movement or vibration

- When standing up and/or sitting down.
- When doing sports other than walking.
- When ascending or descending stairs or on a steep slope.
- When there is vertical or horizontal vibration in a moving vehicle such as on the bicycle, in a car, trains or a bus.

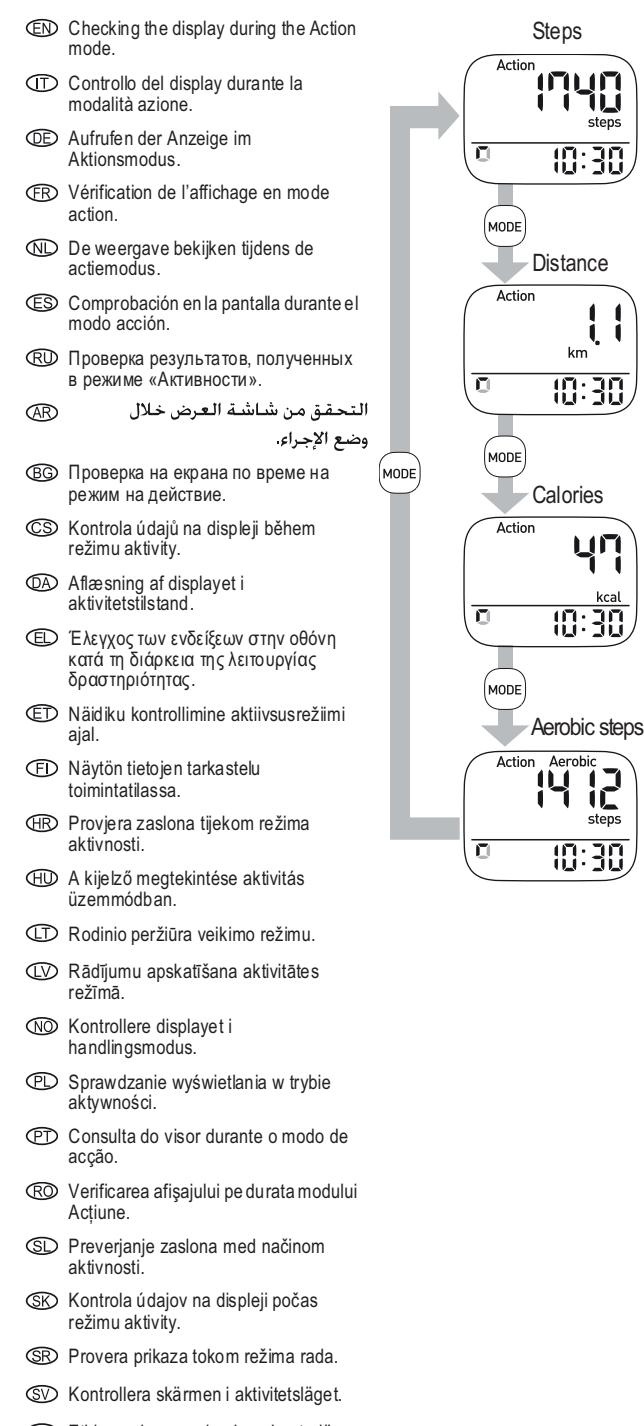

When walking very slowly

Note:

In order to avoid counting steps that are not part of a walk, the unit does not display the step count for the first 4 seconds of walking. If you continue walking for more than 4 seconds, it displays the step count for the first 4 seconds and then continues to count.

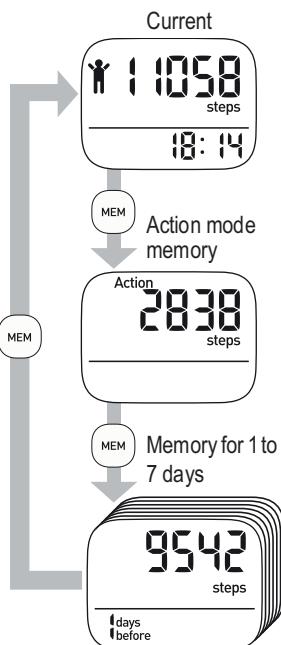

5.

The Action mode allows you to track your individual walks separately. Press ● for two seconds to start the Action mode. To stop the Action mode press ● for two seconds.

6.

Symbols and definitions are as follows:

⚠ Caution: Improper use may result in injury or property damage.

⚠ Caution:

- Contact your doctor or healthcare provider before beginning a weight reduction or exercise program.
- Keep the unit out of the reach of young children.
- Always take a rest if you feel tired or experience pain while exercising. If the pain or discomfort continues, immediately stop your exercise and consult a doctor.
- If young children swallow any small piece, immediately consult a doctor.
- Do not swing the unit by the strap. Swinging the unit while holding the strap may cause an injury.
- Do not put the unit in the back pocket of your shorts or trousers. It could be damaged if you sit down while the unit is still in your pocket.
- Do not insert the battery with the polarities in the wrong direction.
- Always use the type of battery indicated.
- Replace a worn battery with a new one immediately.
- Remove the battery from this unit when you are not going to use it for a long period of time (approximately 3 months or more).
- Do not immerse the unit or any of the components in water. The unit is not waterproof.

OMRON HEALTHCARE EUROPE B.V. guarantees this product for 2 years after date of purchase. The guarantee does not cover battery, strap, clip, packaging and/or damages of any kind due to misusage (such as dropping or physical misuse) caused by the user. Claimed products will only be replaced when returned together with the original invoice / cash ticket.

Do not disassemble or modify the unit. Changes or modifications not approved by OMRON HEALTHCARE will void the user warranty.

Technical Data

Product description	Step counter
Model	OMRON Walking style IV (HJ-325-EB / HJ-325-EW)
Power supply	3V Lithium battery type CR2032
Battery life	Approx. 6 months* (when used for 14 hours a day)
	Note: Supplied battery is for trial use. This battery can run out within 6 months.
Measurement range	Steps 0 to 99,999 steps Calories 0 to 59,999 kcal Aerobic Steps 0 to 99,999 steps Distance walked 0.0 to 999.9 km / 0.0 to 621.3 miles
Setting range	Time 0:00 to 23:59 Height 100 to 199 cm with an increment of 1 cm / 3'4" to 6'6" with an increment of 1 inch Weight 30 to 136 kg with an increment of 1 kg / 66 to 300 lb with an increment of 1 lb Stride length 30 to 120 cm with an increment of 1 cm / 12" to 48" with an increment of 1 inch
	Operating temperature -10°C to +40°C (14°F to 104°F) Humidity 30 to 85% RH External dimensions 42.0 (W) × 57.0 (H) × 13.0 (D) mm Weight Approx. 23 g (including battery) Contents Step counter, 3V lithium battery type CR2032, clip, strap and instruction manual

These specifications are subject to change without notice. This OMRON product is produced under the strict quality system of OMRON HEALTHCARE Co., Ltd. Japan.

* New battery life based on OMRON testing.

Battery disposal EC Directive 2006/66/EC

Batteries are not a part of your regular household waste. You must return batteries to your municipality's public collection or wherever batteries of the respective type are being sold.

Disposal of electric and electronic devices EC Directive 2012/19/EU

This product is not to be treated as regular household waste but must be returned to a collection point for recycling electric and electronic devices. Further information is available from your municipality, your municipality's waste disposal services, or the retailer where you purchased your product.
